

System and Method for Testing a Communications Server

Abstract of the Disclosure

47 A system and method of testing a bank of modems. A test bed includes a RAS concentrator, wherein the RAS concentrator includes means for spoofing operation of a plurality of modems. The RAS concentrator is connected to a communication server having one or more concentrators or a bank of modems. Software is executed in the test bed to establish a plurality of simultaneous connections between the RAS concentrator and the bank of modems.
